PERSONAL PROFILE

I'm a developer with a passion for work organization and that's what led me to want a career change and try to open my own business. During my career I was working as well as a freelancer and for companies where I always assumed a leadership role.

I have experience programming and also leading teams, not only at work, I used to play soccer and basketball in different clubs where I was the captain, and that meant organizing all the team inside the pitch for a greater good.

Throughout my career I have worked on many projects with multiple languages and technologies like PHP, Laravel, Symfony, CakePHP, JavaScript, Vue.JS, ReactJS, TypeScript, Angular, Node.JS, Python, Docker, Dart, Flutter, GIT and so others.

Work Experience

jackCode - *Founder*

SEPTEMBER 2019 - PRESENT

- Full creation of Digital Products.
- Help companies to develop their own products or features.
- Advise clients with the technologies that I consider necessary for each development.

Horizon Web, Malta - *Lead Developer*

DECEMBER 2021 - PRESENT

- Forming part of a skilled team of developers with close relation with the Product Owner and CEOs.
- Lead the development, transformation, and delivery of the best possible digital product.
- My goal is to plan, define, and implement both product and technical roadmaps and architecture.

Horizon Web, Dublin - *Full Stack Developer*

NOVEMBER 2020 - DECEMBER 2021

- I am responsible for creating new web apps that the owners require.
- I deploy in production at the end of every task via FTP and SSH.
- Mainly I work alone, weekly I make a sample of what has been done to the managers.

Padelmanager, Malaga - *Full Stack Developer*

DECEMBER 2019 - NOVEMBER 2020

- I was responsible for supporting the platform that is already in use, both for the web and mobile.
- I was in charge of making the deployments in production at the end of the Sprints.
- Together with the team of developers we take care of carrying out the new projects that the product owners request of us.

Logiscool, Málaga - *Professor*

OCTOBER 2019 - FEBRUARY 2020

- I was teaching a block programming course to a group of children in which the objective was to make web games.
- Every week I prepare each class so that the children can go home with the game finished.

Dirección General de Cultura y Educación - *Consultant*

AUGUST 2016 - AUGUST 2018

- I was an active part of the logistics and management team for the implementation of the National School Connectivity Plan, this plan consists of bringing Internet and a Cisco Meraki technological floor to more than 8,000 educational establishments in the province of Buenos Aires.
- I was mainly in charge of the logistics part, coordinating the installations with institutions and companies. Around 300 weekly installations were carried out.

CR Construcciones S.A. - *Secretary*

JANUARY 2013 - JULY 2016

- I worked as personal secretary to the president of the company.
- I handled the payments and collections of the company both in the private sector and also in the public part.
- I also had staff in charge with whom we organized the documentation and other papers to deliver in public and private bidding in which we competed.

Citarella S.A. - *Technician*

JANUARY 2007 - JULY 2007

- Performed the PC assembly for tenders, the installation of operating systems and packages that were required according to them.
- I also solved and advised simple software problems in general.

PROJECT EXPERIENCE

- **Real Crypto Way (MVP)** - https://github.com/Crissavino/generator - https://realcryptoway.com/ - Node.JS, React.JS, SmartContracts, Hardhat, Solidity, MongoDB, Metamask API - jackCode
Real crypto way is an NFT image generator thought for designers who want to create an NFT but don't have the technical skill to do it. They only need to upload their layers folder, add some configuration, layers rarity and after that they will have all your NFT images mixed and created. For the second stage, which is under development, they will be able to create their own smart contract, post it on the blockchain and mint the NFT all directly from their connected space

- **Fulbito** - https://github.com/Crissavino/fulbi_app https://github.com/Crissavino/fulbi_backend - App Store - Google Play - PHP, Laravel, JavaScript, HTML5, CSS3, SQL, Flutter, Dart, Google Place Search API, Google Maps API, Firebase, Sentry, Crashlytics - jackCode
Tinder-like app where you can find football matches or football players available in your area. Anyone can create a match and invite other users. Every match has a chat inside it and it will be deleted 2 hours after the play hour. Also provides a dashboard where admin users can manage their matches and see their users.

- **Contador de palabras online** - https://github.com/Crissavino/cpo - PHP, Laravel, JavaScript, HTML5, CSS3, SQL, jQuery - jackCode
I offer a tool to count letters, words, sentences, paragraphs and spaces, also the algorithm calculates the most used words. And offer a SEO viewer where you can add your site information and check how that will look on Google Search. I monetize the site with Google Ads

- **Horizon Web** - Dublin, Ireland

I'm currently working at Horizon Web. Here we create easy, intuitive and massive web applications which we monetize. We use the PHP

framework, cakePHP, MAMP / XAMP / WAMP, JavaScript, Bootstrap, AmazonS3, blockchain file storage through IPFS.

- **EJI Villarreal** - https://github.com/Crissavino/villarreal - https://ejivillarreal.com - PHP, Laravel, JavaScript, HTML5, CSS3, SQL, jQuery - jackCode

  In this project, what the client wants is a contact website where people seeking legal advice can find it. Also how much of a blog with a dashboard where you can upload and edit notes and their tags.

- **Padelmanager** - https://padelmanager.com - PHP, Laravel, JavaScript, HTML5, CSS3, SQL, jQuery, Angular - Malaga, Spain

  I was working in this exciting sports startup. Where amateur paddle players can see their ranking and tournaments in which they participate that are managed from the web by the clubs. My tasks were several, such as, for example, supporting the Mobile APP backend, developing new functionalities for the web administration that the clubs have on their administrator boards, and new developments. I always tried to contribute new ideas and implement technologies that perhaps were not being applied before, Angular is an example.

- **Maria Celina Romero Mc Intosh Psychologist** - https://github.com/Crissavino/celina.github.io - Node.JS - jackCode

  This is a website that is under development for a psychologist with many patients from Fuengirola, Malaga, Spain. By which patients in addition to knowing more about the professional can book a call to make an interview by phone.

- **Digital input application for victims of trafficking in persons** - https://github.com/Crissavino/app_trata - PHP, Laravel, JavaScript, HTML5, CSS3, SQL, jQuery - Ministry of Justice of the Province of Buenos Aires, Argentina

  This is a project developed for the Ministry of Justice of the Province of Buenos Aires, Argentina. Given the growing problem of trafficking in persons in the province, it was necessary to have an entry system for the victims rescued in police raids. It consists of many forms of personal data for the victim's entry and several heat maps generated with the data provided to be able to draw a potential danger zone.

- **Genoveva** - https://github.com/Crissavino/genovevaFE - https://github.com/Crissavino/genovevaBE - PHP, Laravel, Angular, JavaScript, HTML5, CSS3, SQL, jQuery - jackCode

  This is an e-commerce project carried out for a group of girls who sold clothes through instagram with more than 30 thousand followers. separate the frontend (Angular) and the backend (Laravel) by performing an API to be consumed from the front. You can see it at https://genovevaok.com

- **Re Faciles** - https://github.com/Crissavino/refaciles - PHP, Laravel, JavaScript, HTML5, CSS3, SQL, jQuery - jackCode

  This is a project for a girl who had an instagram of recipes with many followers and wanted to make a blog where she can upload her recipes and exchange opinions with her clients.

- **MrMovy** - https://github.com/Crissavino/mrmovy_laravel - PHP, Laravel, JavaScript, HTML5, CSS3, SQL, jQuery - Freelance

  This is one of my first projects. It is a web app that recommends movies based on your personal tastes. You have to complete a series of questions and based on that it recommends 3 (or more) movies within the 100 best according to IMDB.

Education

Google - *Google Project Management Certificate*
MAY 2021
Throughout the 6 courses that make up the certification, I gained in-demand skills that prepared me for an entry-level job. I learned from Google employees whose foundations in project management served as launchpads for their own careers.

The content was highly interactive and exclusively developed by Google employees with decades of experience in program and project management.

I learned skills that include: Creating risk management plans; Understanding process improvement techniques; Managing escalations, team dynamics, and stakeholders; Creating budgets and navigating procurement; Utilizing project management software, tools, and templates; Practicing Agile project management, with an emphasis on Scrum.

This program qualified me for over 100 hours of project management education.

Udemy - *Flutter: Take your knowledge to the next level*
OCTOBER 2020

The course has robust structures both in the Frontend (Flutter) and in the Backend (Mainly Node), which will help us to create all the applications and manage the centralized information, it also has deployments of our APIS and Socket Server to perform the real tests on devices and have full control of authentication through social networks.

Another objective of the course is to help you lose your fear of patterns like BLoC so that we can appreciate the potential and its power without losing control of the state at any time.

By the end of the course, you will have created real-time tracking applications, chats, collections, authentications, backend, mastering BLoC and other status managers, password encryption, user session management, Apple and Google sign-in and much more. that you will need when you want to create an application that requires one or all of these technologies.

Udemy *- Flutter: Your complete development guide for iOS and Android*
JUNE 2020
In this course I was learning about Dart from scratch, I also understood the fundamental concepts to carry out any app design, I learned to carry out the deployment of stores, use the Flutter SDK to make applications and master a large number of Widgets.

Udemy *- Angular*
JULY 2019
In this course I acquired a solid base to work with Angular, apply the concepts of ECMAScript 6 in projects, create basic applications with Ionic, learn TypeScript from scratch to create applications with Angular, create them following good practices and mastering directives, pipes , components, services and structuring each application in the best way.

Digital House, Buenos Aires *- Full Stack Web Developer*
